

REMOTE LEARNING PROGRAM

Fairmont's remote learning option gives students a virtual window into the classroom, connecting them with teachers and classmates for an immersive learning experience.

The Fairmont Difference

- Live streamed instruction from the classroom
- Robust use of technology to create an immersive educational experience, including a robotic device called **Swivl™** (coming soon) which enables a camera to track the teacher as he or she moves around the classroom
- Big screen monitors in classrooms, enabling teachers to view their remote students
- Small class sizes with individualized attention
- Extensive teacher training to address students' social-emotional needs during this challenging time
- Enhanced software programs featuring premier platforms
- Instruction guided by Fairmont's rigorous standards
- Amplified student engagement and interactive learning through the use of **Nearpod™**
- Continued instruction in Music, Art, Drama, PE, Language, and Computers
- Family support available through parent workshops and feedback sessions

Prepared to Reopen On-Campus

While some families have fully embraced the remote learning platform, others are eager for their children to return to campus as soon as the state allows it. When that day comes, our comprehensive reopening plan will be activated, ensuring that safety is paramount and students come first! We will offer in-person instruction — **five days a week and full days** — with experienced teachers, further differentiating us from almost every other school in Orange County.
